

Managing HIV/AIDS With Oral Health Screening

Problem

When paired with **weakened immune systems**, lack of dental care puts many people with HIV at a **higher risk for oral diseases** and **compromised well-being**.

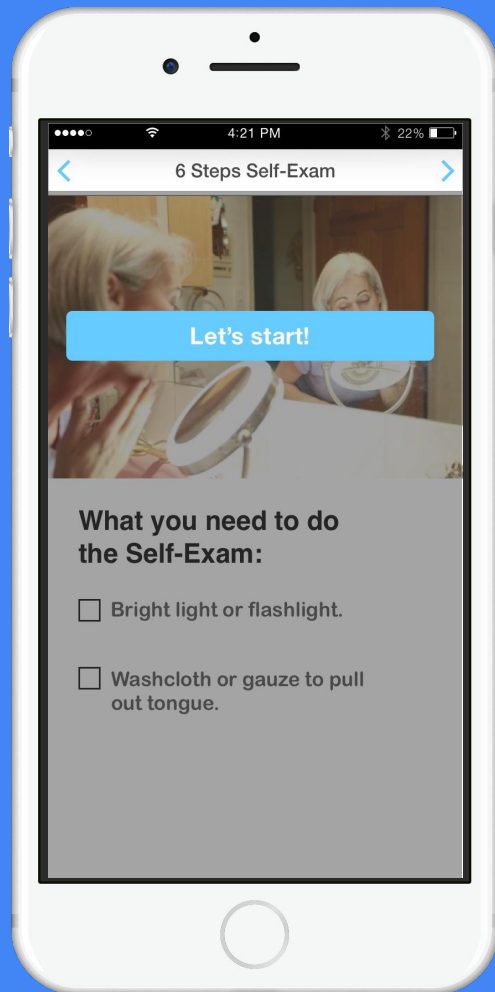

A young woman with long, dark braids is smiling broadly while sitting on a swing. She is wearing a white shirt. The background is a soft-focus outdoor setting with trees and foliage. The text is overlaid on the left side of the image.

Mission statement:

Help HIV/AIDS patients live overall healthier lives by providing them a tool to learn and keep track of their oral health.

The solution

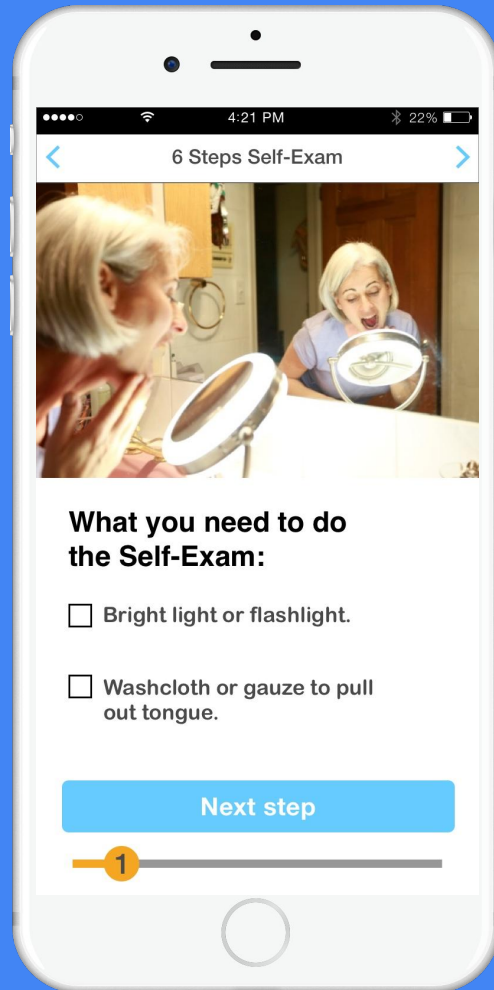

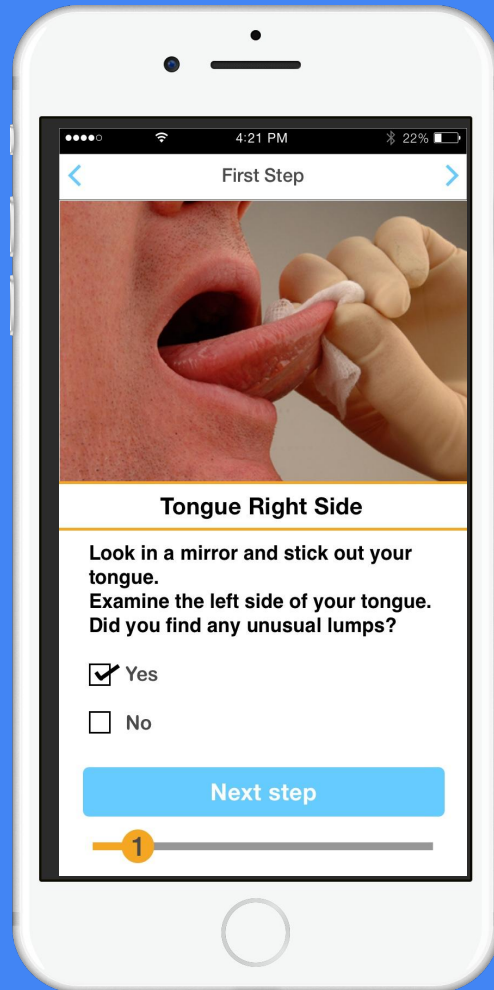

6 Steps Self-Exam

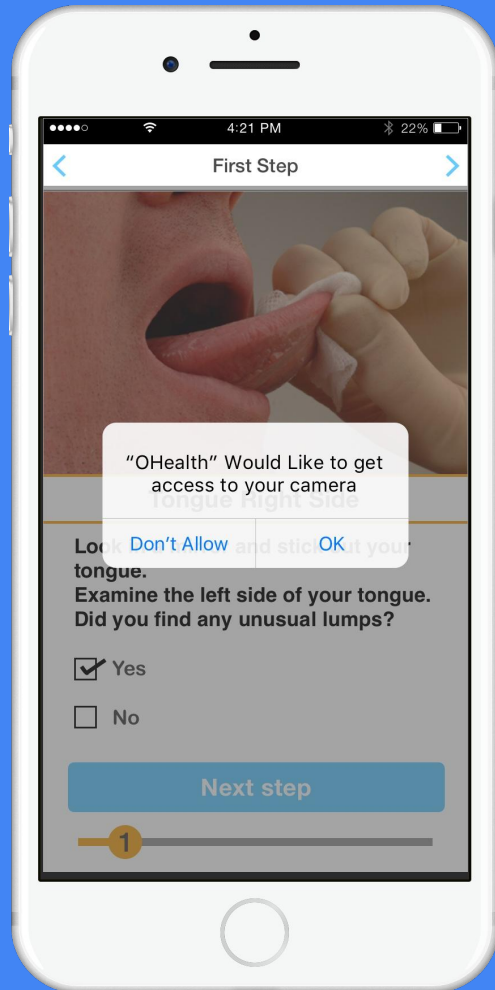

Let's start!

What you need to do the Self-Exam:

- ☐ Bright light or flashlight.
- ☐ Washcloth or gauze to pull out tongue.

4:21 PM 22%

< Question 1

When was the last time you had a check-up with a dentist?

☐ Within the last 6 months

☐ Between 6 months and 1yr

☒ Greater than one year
